# National Environmental Public Health Tracking Network Data Sources

The National Environmental Public Health Tracking Network is a system of integrated health, exposure, and hazard data from a variety of national, state, and city sources.

# **Data from State and City Sources**

CDC provides funds for 24 state and local health departments to develop local tracking networks that contribute to the National Tracking Network. These health departments supply the data below. Note: Some new states are not ready to submit data and are not included below.

Health Department	Asthma Hospitalizations	Carbon Monoxide Hospitalizations	Carbon Monoxide Emergency Visits	Heart Attack Hospitalizations	Community Drinking Water Supply	Birth Defects
California		٠				
Colorado		٠		•		44
Connecticut		٥		•	9	44
Florida		•		•	9	43
Louisiana				<b>V</b>		
Maine		•		•		<b>E.</b>
Maryland		•		•		
Massachusetts		٥		<b>V</b>		
Minnesota		•		•	9	
Missouri		•		<b>Y</b>		<b>E</b> 3
New Hampshire		•		•		6.3
New Jersey		0		•		63
New Mexico		•		<b>V</b>		<b>E.</b>
New York City		0		•	9	<b>E.</b>
New York State		•		•		6.3
Oregon		0		•	9	
Pennsylvania	j	•		•		
South Carolina		•		•		
Utah		•		•		6.3
Washington		0		•	9	
Wisconsin		•		•		6.3

# National Environmental Public Health Tracking Network Data Sources

## **Data from National Sources**

Federal agencies provide data to the National Tracking Network for the content areas shown below. Though these data are from national sources, each agency provides data for only the shaded states.

### **Air Quality Monitoring (Monitor + Modeled)**

PM<sub>25</sub> and Ozone
